## TRIPOD Checklist: Prediction Model Development

| Section/Topic                      | Item     | Checklist Item  | Page     |
|------------------------------------|----------|---|----------|
| Title and abstract                 |          |   |          |
| Title                              | 1        | Identify the study as developing and/or validating a multivariable prediction model, the target population, and the outcome to be predicted.  | 1        |
| Abstract                           | 2        | Provide a summary of objectives, study design, setting, participants, sample size, predictors, outcome, statistical analysis, results, and conclusions.   | 1        |
| Introduction                       |          | production, catalogical analysis, results, and contractions   |          |
| Background and objectives          | 3a       | Explain the medical context (including whether diagnostic or prognostic) and rationale for developing or validating the multivariable prediction model, including references to existing models.      | 2        |
|                                    | 3b       | Specify the objectives, including whether the study describes the development or validation of the model or both.   | 3        |
| Methods                            |          |   |          |
| Source of data                     | 4a       | Describe the study design or source of data (e.g., randomized trial, cohort, or registry data), separately for the development and validation data sets, if applicable.                               | 3        |
|                                    | 4b       | Specify the key study dates, including start of accrual; end of accrual; and, if applicable, end of follow-up.  | 3        |
| Participants                       | 5a       | Specify key elements of the study setting (e.g., primary care, secondary care, general population) including number and location of centres.  | 3        |
|                                    | 5b       | Describe eligibility criteria for participants.   | 3,6<br>4 |
| Outcome                            | 5c<br>6a | Give details of treatments received, if relevant.  Clearly define the outcome that is predicted by the prediction model, including how  | 4        |
|                                    | 6b       | and when assessed.  Report any actions to blind assessment of the outcome to be predicted.  | N/A      |
| Predictors                         | 7a       | Clearly define all predictors used in developing or validating the multivariable prediction model, including how and when they were measured.   | 5        |
|                                    | 7b       | Report any actions to blind assessment of predictors for the outcome and other predictors.  | N/a      |
| Sample size                        | 8        | Explain how the study size was arrived at.  | 3,6      |
| Missing data                       | 9        | Describe how missing data were handled (e.g., complete-case analysis, single imputation, multiple imputation) with details of any imputation method.  | 5        |
| Statistical<br>analysis<br>methods | 10a      | Describe how predictors were handled in the analyses.   | 5        |
|                                    | 10b      | Specify type of model, all model-building procedures (including any predictor selection), and method for internal validation.   | 5        |
|                                    | 10d      | Specify all measures used to assess model performance and, if relevant, to compare multiple models.   | 5        |
| Risk groups                        | 11       | Provide details on how risk groups were created, if done.   | N/A      |
| Results                            |          | Describe the flow of participants through the study including the number of   | 1        |
| Participants                       | 13a      | Describe the flow of participants through the study, including the number of participants with and without the outcome and, if applicable, a summary of the follow-up time. A diagram may be helpful. | Tab.1    |
|                                    | 13b      | Describe the characteristics of the participants (basic demographics, clinical features, available predictors), including the number of participants with missing data for predictors and outcome.    | Tab1,2   |
| Model                              | 14a      | Specify the number of participants and outcome events in each analysis.   | 6        |
| development                        | 14b      | If done, report the unadjusted association between each candidate predictor and outcome.  | N/A      |
| Model<br>specification             | 15a      | Present the full prediction model to allow predictions for individuals (i.e., all regression coefficients, and model intercept or baseline survival at a given time point).                           | 9-11     |
|                                    | 15b      | Explain how to the use the prediction model.  | 11       |
| Model performance                  | 16       | Report performance measures (with CIs) for the prediction model.  | 9-11     |
| Discussion                         |          |   | •        |
| Limitations                        | 18       | Discuss any limitations of the study (such as nonrepresentative sample, few events per predictor, missing data).  | 12-13    |
| Interpretation                     | 19b      | Give an overall interpretation of the results, considering objectives, limitations, and results from similar studies, and other relevant evidence.  | 11-12    |
| Implications                       | 20       | Discuss the potential clinical use of the model and implications for future research.   |          |
| Other information                  |          |   |          |
| Supplementary information          | 21       | Provide information about the availability of supplementary resources, such as study protocol, Web calculator, and data sets.   | 13       |
| Funding                            | 22       | Give the source of funding and the role of the funders for the present study.   | 13       |

We recommend using the TRIPOD Checklist in conjunction with the TRIPOD Explanation and Elaboration document.
